

The 2<sup>nd</sup> International Symposium on Climate Change & Dendrochronology in Caspian Ecosystems"

The Caspian Ecosystems Research Institute and Faculty of Natural Resources of Sari University are going to hold "The 2<sup>nd</sup> International Symposium on Climate Change & Dendrochronology in Caspian Ecosystems" as a joint international conference with collaboration of "International Association of Wood Anatomists (IAWA)".

This Symposium will provide a forum for researchers and scientists from different parts of the world and country to discuss the role of dendrochronology in climate change studies and climate change potential impact on botanical ecosystems, also to discuss new achievements and approaches in the related fields. In Symposium papers will be presented as oral and poster.

For further information regarding to conference topics, abstract submission, registration, etc. please explore the conference website via following address;
